

FASOUL & LIGHTEC DEBUT ON TRACK AS BATMOBILE RACING SWEEPS DOUBLE VICTORY AT LAMBORGHINI SUPER TROFEO ASIA, FUJI SPEEDWAY

FUJI SPEEDWAY, JAPAN — Fasoul made its motorsport debut at Fuji Speedway, as partner team Batmobile Racing delivered a dominant double victory in the Pro class at the **Lamborghini Super Trofeo Asia**. Drivers **William Tregurtha** (United Kingdom) and **Jonathan Cecotto** (Monaco) piloted the Car #3 Lamborghini Huracán Super Trofeo EVO2 — to P1 in Race 1 and P1 in Race 2, standing out among a competitive field of Lamborghini race cars with a perfect weekend result.

Trackside with Fasoul

Against the stunning backdrop of Mount Fuji, Fasoul hosted an exclusive trackside reception for partners and guests throughout the race weekend. Attendees joined Fasoul and Lightec representatives for a guided tour of the Batmobile Racing pit garage, experiencing the intensity of race preparation up close before watching the action unfold from the team's hospitality area.

Fasoul Q1 PRO Racing Edition

To commemorate the partnership's debut at Fuji Speedway, Fasoul previewed a special-edition visual design inspired by the Car #3 Batmobile Racing livery, the **Fasoul Q1 PRO Racing Edition**. Further product information, where applicable, will be communicated only through appropriate age-restricted official channels in accordance with laws and regulations.

At the core of the limited edition is Fasoul's **EverCore Tube Technology** — a next-generation composite glass heating element that delivers full-zone uniform heating, extending heater lifespan to over two years and raising stick utilisation rates to 90%. This thermal foundation enables Fasoul's innovative **Secondary Mode**, whereby a tobacco stick already used once with another HNB device can be inserted into a Fasoul device and enjoyed again — effectively enabling one stick to be used twice — translating into improved utilisation.

About Fasoul

Fasoul is a technology-driven brand dedicated to innovation in the heat-not-burn (HNB) sector. Through continuous engineering research and product development, Fasoul is committed to driving product evolution and enhancing user experiences, delivering greater value to adult consumers.
